Confidential — Prepared exclusively for ABC LLC. Unauthorized distribution prohibited.

Recommendation Summary

Prioritized remediation opportunities and priority-impact ratings

CURRENT STACKSCORE

39

Initial

Target: 80+

57 IDENTIFIED RECOMMENDATIONS	**57** IMPROVEMENT OPPORTUNITIES
33 PRIORITY ACTIONS	**33** CRITICAL + HIGH

RECOMMENDATION INDEX

Sorted by priority (Critical → High → Medium → Low), then by highest priority-impact rating within each group. Ratings are planning weights for sequencing—not guaranteed StackScore increases.

Critical Priority (13)

1.	Assess and remediate vulnerabilities on a regular schedule	10
2.	Patch operating systems and applications consistently	10
3.	Protect endpoints with centrally managed security software	10
4.	Standardize centrally administered productivity capabilities	10
5.	Implement monitoring for security-relevant system events	10

Confidential — Prepared exclusively for ABC LLC. Unauthorized distribution prohibited.

6.	Segment the network to limit unnecessary access	10
7.	Establish a practical incident response process	10
8.	Require multi-factor authentication for privileged and business-critical access	10
9.	Establish a continuous technology improvement cadence	10
10.	Align technology decisions with stated business goals	10
11.	Establish a documented technology roadmap	10
12.	Manage shared and service credentials in a controlled secret store	10
13.	Centralize workforce identity and authentication	10

High Priority (20)

14.	Establish a planned technology budget	8
15.	Separate privileged administrator accounts from everyday user accounts	8
16.	Retain security logs long enough to support investigations	8
17.	Reduce high-friction manual workflows with technology	8
18.	Document and operate a joiner–mover–leaver access process	8
19.	Apply security updates promptly across critical systems	8
20.	Deliver recurring security awareness training for employees	8
21.	Secure remote connectivity for offsite access	8
22.	Standardize endpoint configurations	8
23.	Document the business network for support and recovery	8
24.	Document standard operating procedures for key IT work	8
25.	Document critical system configurations for rebuild and support	8
26.	Review technology risks with leadership on a defined cadence	8

Confidential — Prepared exclusively for ABC LLC. Unauthorized distribution prohibited.

27.	Enable remote management for company devices	8
28.	Protect backups from compromise and tampering	8
29.	Encrypt portable devices that store or cache business data	8
30.	Maintain DNS, DHCP, and other core network services	8
31.	Monitor the network for availability and performance issues	8
32.	Standardize collaboration tools for teams	8
33.	Secure remote access with strong authentication and encryption	6

Medium Priority (10)

34.	Standardize how business documents are organized	6
35.	Plan hardware lifecycle and refresh	6
36.	Make the environment supportable by another IT professional	6
37.	Keep technology documentation current after changes	6
38.	Conduct executive technology reviews on a defined schedule	6
39.	Review business applications on a defined cadence	6
40.	Maintain a current technology asset inventory	6
41.	Support secure mobile and on-the-go work	6
42.	Document and run a device lifecycle process	6
43.	Establish an internet resilience strategy for business continuity	6

Low Priority (14)

44.	Maintain licensing and warranty records	4
45.	Define a clear technology vision for the organization	4

Confidential — Prepared exclusively for ABC LLC. Unauthorized distribution prohibited.

46.	Review user permissions on a recurring schedule	4
47.	Document critical vendors and support contacts	4
48.	Document data retention requirements	4
49.	Monitor endpoint hardware health	4
50.	Keep network documentation current after changes	4
51.	Continuously improve security practices based on incidents and reviews	4
52.	Ensure employees have the technology needed to succeed	4
53.	Assign ownership for endpoint management	3
54.	Assign ownership for technology documentation	3
55.	Assign ownership for productivity and collaboration improvements	3
56.	Assign ownership for recovery readiness	3
57.	Assign clear technology leadership ownership	3

Confidential — Prepared exclusively for ABC LLC. Unauthorized distribution prohibited.

Technology Maturity Roadmap

Current maturity and target threshold for executive planning

Use this view to compare your current StackScore against the maturity target. Prioritized recommendations identify where remediation work should begin; StackScore improvement is confirmed through reassessment.

Current StackScore	39
Target Score	80+

HOW TO USE THIS ROADMAP

- Address Critical items first to reduce immediate business and security risk.
- High-priority items deliver the next wave of meaningful score improvement.
- Medium and Low items complete the path toward the 80+ maturity target.

Confidential — Prepared exclusively for ABC LLC. Unauthorized distribution prohibited.

Executive Summary

Leadership briefing of assessment findings and next priorities

CURRENT STACKSCORE

39

Initial

Target: 80+

Critical Exposure Warning

Immediate remediation is recommended to reduce business risk and protect operational continuity.

ASSESSMENT OVERVIEW

ABC LLC currently reflects an initial level of technology maturity. Technology capabilities are largely absent, ad hoc, or reactive. The overall StackScore of 39 establishes a clear baseline for improvement planning.

Data Protection & Recovery represents the strongest area of the technology environment and provides a practical foundation to extend improvements into weaker domains.

The highest-risk areas are Documentation & Knowledge, Technology Strategy, and Endpoint Management, where maturity scores indicate the greatest exposure to operational or security disruption. The assessment also identified critical security or recovery gaps that warrant prompt remediation before broader initiatives proceed.

Near-term priorities should focus on assess and remediate vulnerabilities on a regular schedule, patch operating systems and applications consistently, protect endpoints with centrally managed security software, standardize centrally administered productivity capabilities, and implement monitoring for security-relevant system events. These items represent the highest-priority opportunities identified during the assessment and provide a practical starting point for remediation planning.

Addressing the prioritized recommendations in this report will strengthen technology maturity over time. Actual outcomes depend on implementation quality, sequencing, and organizational follow-through. StackScore improvement is confirmed through reassessment after remediation work is completed.

This report is designed to support informed leadership decisions and forms the basis of your upcoming Technology Assessment Strategy Session, where we will review these findings together and align on a practical path forward.

Confidential — Prepared exclusively for ABC LLC. Unauthorized distribution prohibited.

Overall Risk

- Overall StackScore: 39 / 100 (Initial)
- 40 critical security or recovery gaps identified
- 57 improvement opportunities requiring follow-up (57 open)

Top Strengths

- Data Protection & Recovery: 90% (Mature)

Top Risks

- Documentation & Knowledge: 8% (Initial)
- Technology Strategy: 24% (Initial)
- Endpoint Management: 28% (Initial)

Immediate Priorities

- Assess and remediate vulnerabilities on a regular schedule (priority-impact rating 10)
- Patch operating systems and applications consistently (priority-impact rating 10)
- Protect endpoints with centrally managed security software (priority-impact rating 10)
- Standardize centrally administered productivity capabilities (priority-impact rating 10)
- Implement monitoring for security-relevant system events (priority-impact rating 10)

Improvement Opportunities

- Current StackScore: 39 (Initial)
- 57 improvement opportunities identified for follow-up
- Roadmap progress tracks approved initiatives; official StackScore updates after reassessment

Confidential — Prepared exclusively for ABC LLC. Unauthorized distribution prohibited.

Detailed Recommendations

Prioritized remediation guidance with business impact and service alignment

Recommendations are organized by priority. Each card includes a priority-impact rating (planning weight for sequencing—not a guaranteed StackScore increase), recommended service, and business impact to support project planning.

Critical Priority (13)

Assess and remediate vulnerabilities on a regular schedule

CRITICAL

PRIORITY-IMPACT RATING

10 (planning weight)

RECOMMENDED SERVICE

Security Operations Improvement

BUSINESS IMPACT

Unpatched or misconfigured systems can expose organizations to preventable security incidents and operational disruptions. Without recurring vulnerability assessment, known weaknesses can accumulate across servers, endpoints, and Internet-facing services.

CATEGORY

Security Operations

Patch operating systems and applications consistently

CRITICAL

PRIORITY-IMPACT RATING

10 (planning weight)

RECOMMENDED SERVICE

Endpoint Management Improvement

BUSINESS IMPACT

Inconsistent endpoint patching leaves known defects available longer and creates uneven risk across users. Unpatched browsers, office suites, and operating systems are frequent entry paths for malware and account compromise in SMB environments.

CATEGORY

Endpoint Management

Confidential — Prepared exclusively for ABC LLC. Unauthorized distribution prohibited.

Protect endpoints with centrally managed security software

CRITICAL

PRIORITY-IMPACT RATING

10 (planning weight)

RECOMMENDED SERVICE

Endpoint Management Improvement

BUSINESS IMPACT

Endpoints without centrally managed security software are harder to protect consistently and harder to investigate when something goes wrong. Local-only or missing protection increases the chance that malware or unauthorized tools persist unnoticed.

CATEGORY

Endpoint Management

Standardize centrally administered productivity capabilities

CRITICAL

PRIORITY-IMPACT RATING

10 (planning weight)

RECOMMENDED SERVICE

Productivity & Collaboration Improvement

BUSINESS IMPACT

When email, calendar, and core file collaboration are scattered across personal accounts or disconnected tools, support and offboarding become inconsistent and security controls are hard to apply evenly. Standardized, centrally administered productivity capabilities give the organization a manageable baseline for day-to-day work.

CATEGORY

Productivity & Collaboration

Implement monitoring for security-relevant system events

CRITICAL

PRIORITY-IMPACT RATING

10 (planning weight)

RECOMMENDED SERVICE

Security Operations Improvement

BUSINESS IMPACT

Without monitoring, unauthorized access, malware activity, or failed attack attempts may go unnoticed until downtime or data loss is already underway. Late detection typically increases recovery time and cost for an SMB.

CATEGORY

Security Operations

Confidential — Prepared exclusively for ABC LLC. Unauthorized distribution prohibited.

Segment the network to limit unnecessary access

CRITICAL

PRIORITY-IMPACT RATING

10 (planning weight)

RECOMMENDED SERVICE

Network & Connectivity Improvement

BUSINESS IMPACT

Flat networks let a single compromised device or guest reach servers, backups, and line-of-business systems. Appropriate segmentation contains incidents and reduces accidental access to sensitive systems.

CATEGORY

Network & Connectivity

Establish a practical incident response process

CRITICAL

PRIORITY-IMPACT RATING

10 (planning weight)

RECOMMENDED SERVICE

Security Operations Improvement

BUSINESS IMPACT

When an incident occurs without a defined response process, teams lose time deciding who to call, what to isolate, and how to communicate. That delay increases downtime, data-loss risk, and confusion for customers and staff.

CATEGORY

Security Operations

Require multi-factor authentication for privileged and business-critical access

CRITICAL

PRIORITY-IMPACT RATING

10 (planning weight)

RECOMMENDED SERVICE

Identity & Access Improvement

BUSINESS IMPACT

Password-only access to admin accounts and critical systems is a common path to ransomware, fraud, and data theft. For an SMB, a single compromised privileged credential can interrupt operations, expose customer or financial data, and create costly recovery work.

CATEGORY

Identity & Access

Confidential — Prepared exclusively for ABC LLC. Unauthorized distribution prohibited.

Establish a continuous technology improvement cadence

CRITICAL

PRIORITY-IMPACT RATING

10 (planning weight)

RECOMMENDED SERVICE

Technology Strategy Improvement

BUSINESS IMPACT

Without continuous improvement habits, environments plateau after one project wave and slowly accumulate debt. Small recurring fixes that prevent outages never get scheduled.

CATEGORY

Technology Strategy

Align technology decisions with stated business goals

CRITICAL

PRIORITY-IMPACT RATING

10 (planning weight)

RECOMMENDED SERVICE

Technology Strategy Improvement

BUSINESS IMPACT

Technology spend that is not tied to business outcomes creates frustration, duplicate tools, and missed risk reduction. Leaders struggle to decide what to fund when priorities are unclear.

CATEGORY

Technology Strategy

Establish a documented technology roadmap

CRITICAL

PRIORITY-IMPACT RATING

10 (planning weight)

RECOMMENDED SERVICE

Technology Strategy Improvement

BUSINESS IMPACT

Without a shared roadmap, technology work becomes reactive—urgent fires crowd out improvements that protect uptime, security, and growth. Leaders lack a sequenced view of what matters next and why.

CATEGORY

Technology Strategy

Confidential — Prepared exclusively for ABC LLC. Unauthorized distribution prohibited.

Manage shared and service credentials in a controlled secret store

CRITICAL

PRIORITY-IMPACT RATING

10 (planning weight)

RECOMMENDED SERVICE

Documentation & Knowledge Improvement

BUSINESS IMPACT

Credentials stored in spreadsheets, browsers, or shared chats are easy to leak and hard to revoke. For an SMB, one exposed admin or vendor password can interrupt operations, enable fraud, or prolong recovery after an incident.

CATEGORY

Documentation & Knowledge

Centralize workforce identity and authentication

CRITICAL

PRIORITY-IMPACT RATING

10 (planning weight)

RECOMMENDED SERVICE

Identity & Access Improvement

BUSINESS IMPACT

Without a central identity platform, account provisioning, access removal, and password policy become inconsistent across systems. That increases the chance of leftover access after role changes or departures, raises help-desk overhead, and makes it harder to contain unauthorized access if credentials are misused.

CATEGORY

Identity & Access

High Priority (20)

Establish a planned technology budget

HIGH

PRIORITY-IMPACT RATING

8 (planning weight)

RECOMMENDED SERVICE

Technology Strategy Improvement

BUSINESS IMPACT

Without a planned technology budget, renewals, hardware refresh, and security work arrive as surprises. That forces rushed decisions and undercuts multi-quarter improvement plans.

CATEGORY

Technology Strategy

Confidential — Prepared exclusively for ABC LLC. Unauthorized distribution prohibited.

Separate privileged administrator accounts from everyday user accounts

HIGH

PRIORITY-IMPACT RATING

8 (planning weight)

RECOMMENDED SERVICE

Identity & Access Improvement

BUSINESS IMPACT

When administrators use the same account for email and privileged work, routine phishing or malware on a daily workstation can escalate to full system control. That elevates operational disruption risk and increases the cost of containment after an incident.

CATEGORY

Identity & Access

Retain security logs long enough to support investigations

HIGH

PRIORITY-IMPACT RATING

8 (planning weight)

RECOMMENDED SERVICE

Security Operations Improvement

BUSINESS IMPACT

Short or inconsistent log retention makes it difficult to determine how an incident started, what was accessed, and whether the issue is fully contained. That uncertainty prolongs recovery and weakens accountability with customers or partners when questions arise.

CATEGORY

Security Operations

Reduce high-friction manual workflows with technology

HIGH

PRIORITY-IMPACT RATING

8 (planning weight)

RECOMMENDED SERVICE

Productivity & Collaboration Improvement

BUSINESS IMPACT

Manual, repetitive workflows consume staff time and introduce errors that technology can often reduce. Leaving known friction unaddressed caps productivity gains from platforms the organization already owns.

CATEGORY

Productivity & Collaboration

Confidential — Prepared exclusively for ABC LLC. Unauthorized distribution prohibited.

Document and operate a joiner–mover–leaver access process

HIGH

PRIORITY-IMPACT RATING

8 (planning weight)

RECOMMENDED SERVICE

Identity & Access Improvement

BUSINESS IMPACT

Without a defined lifecycle process, new hires may receive inconsistent access, role changes leave excess permissions in place, and departed users retain accounts. That creates avoidable security exposure and recurring administrative cleanup for owners and IT providers.

CATEGORY

Identity & Access

Apply security updates promptly across critical systems

HIGH

PRIORITY-IMPACT RATING

8 (planning weight)

RECOMMENDED SERVICE

Security Operations Improvement

BUSINESS IMPACT

Delayed patching leaves known defects available to attackers and can also cause instability when updates pile up. For SMBs, a single unpatched Internet-facing or backup-related system can drive outsized downtime and recovery expense.

CATEGORY

Security Operations

Deliver recurring security awareness training for employees

HIGH

PRIORITY-IMPACT RATING

8 (planning weight)

RECOMMENDED SERVICE

Security Operations Improvement

BUSINESS IMPACT

Many incidents begin with phishing, unsafe downloads, or accidental data sharing. Without regular awareness training, staff are less prepared to recognize social engineering, which increases the likelihood of account compromise and business email fraud.

CATEGORY

Security Operations

Confidential — Prepared exclusively for ABC LLC. Unauthorized distribution prohibited.

Secure remote connectivity for offsite access

HIGH

PRIORITY-IMPACT RATING

8 (planning weight)

RECOMMENDED SERVICE

Network & Connectivity Improvement

BUSINESS IMPACT

Insecure remote access (shared credentials, exposed remote desktop, or unmanaged tunnels) is a frequent entry point for account takeover and ransomware. Weak remote design also makes support and offboarding unreliable.

CATEGORY

Network & Connectivity

Standardize endpoint configurations

HIGH

PRIORITY-IMPACT RATING

8 (planning weight)

RECOMMENDED SERVICE

Endpoint Management Improvement

BUSINESS IMPACT

One-off device builds create support variation, weaken security baselines, and make onboarding slower. Standard configurations reduce “works on my machine” failures and make policy enforcement practical.

CATEGORY

Endpoint Management

Document the business network for support and recovery

HIGH

PRIORITY-IMPACT RATING

8 (planning weight)

RECOMMENDED SERVICE

Documentation & Knowledge Improvement

BUSINESS IMPACT

When network layout, key devices, and connectivity paths are not documented, outages take longer to diagnose, vendor handoffs become unreliable, and recovery work depends on tribal knowledge. That raises downtime risk and increases the cost of every change or emergency.

CATEGORY

Documentation & Knowledge

Confidential — Prepared exclusively for ABC LLC. Unauthorized distribution prohibited.

Document standard operating procedures for key IT work

HIGH

PRIORITY-IMPACT RATING

8 (planning weight)

RECOMMENDED SERVICE

Documentation & Knowledge Improvement

BUSINESS IMPACT

Undocumented repeatable work produces inconsistent results, longer onboarding for new support staff, and higher error rates during pressure events. Knowledge walks out the door when one person is unavailable.

CATEGORY

Documentation & Knowledge

Document critical system configurations for rebuild and support

HIGH

PRIORITY-IMPACT RATING

8 (planning weight)

RECOMMENDED SERVICE

Documentation & Knowledge Improvement

BUSINESS IMPACT

Without configuration baselines, rebuilds and troubleshooting take longer and increase the chance of incorrect recovery. Provider transitions become riskier because essential settings live only in production systems or personal notes.

CATEGORY

Documentation & Knowledge

Review technology risks with leadership on a defined cadence

HIGH

PRIORITY-IMPACT RATING

8 (planning weight)

RECOMMENDED SERVICE

Technology Strategy Improvement

BUSINESS IMPACT

When technology risks are not reviewed, known gaps remain unprioritized and new threats or dependencies go unnoticed. Leadership learns about problems primarily through incidents.

CATEGORY

Technology Strategy

Confidential — Prepared exclusively for ABC LLC. Unauthorized distribution prohibited.

Enable remote management for company devices

HIGH

PRIORITY-IMPACT RATING

8 (planning weight)

RECOMMENDED SERVICE

Endpoint Management Improvement

BUSINESS IMPACT

Without remote management, routine support, patching, and emergency response depend on physical access or user-driven steps. That slows incident response and increases downtime when staff work remotely or across sites.

CATEGORY

Endpoint Management

Protect backups from compromise and tampering

HIGH

PRIORITY-IMPACT RATING

8 (planning weight)

RECOMMENDED SERVICE

Data Protection & Recovery Improvement

BUSINESS IMPACT

Backups that share the same access path as production can be encrypted or deleted by the same incident that destroys primary data. Hardening backup copies preserves a clean recovery path after ransomware or insider misuse.

CATEGORY

Data Protection & Recovery

Encrypt portable devices that store or cache business data

HIGH

PRIORITY-IMPACT RATING

8 (planning weight)

RECOMMENDED SERVICE

Endpoint Management Improvement

BUSINESS IMPACT

Unencrypted portable devices that store or cache business data turn loss or theft into a likely data-exposure event. Encryption reduces the chance that those files remain readable if hardware leaves organizational control.

CATEGORY

Endpoint Management

Confidential — Prepared exclusively for ABC LLC. Unauthorized distribution prohibited.

Maintain DNS, DHCP, and other core network services

HIGH

PRIORITY-IMPACT RATING

8 (planning weight)

RECOMMENDED SERVICE

Network & Connectivity Improvement

BUSINESS IMPACT

When DNS, DHCP, or related core services are unstable or undocumented, users lose connectivity even when circuits and firewalls are healthy. Informal “someone’s PC is the DHCP server” patterns create fragile single points of failure.

CATEGORY

Network & Connectivity

Monitor the network for availability and performance issues

HIGH

PRIORITY-IMPACT RATING

8 (planning weight)

RECOMMENDED SERVICE

Network & Connectivity Improvement

BUSINESS IMPACT

Without proactive network monitoring, outages and degraded circuits are discovered only when users complain. Late detection extends downtime and makes root-cause analysis harder after the fact.

CATEGORY

Network & Connectivity

Standardize collaboration tools for teams

HIGH

PRIORITY-IMPACT RATING

8 (planning weight)

RECOMMENDED SERVICE

Productivity & Collaboration Improvement

BUSINESS IMPACT

Multiple chat, meeting, and whiteboard tools fragment conversations and complicate security and retention. Standardization reduces tool sprawl and makes support and training feasible.

CATEGORY

Productivity & Collaboration

Confidential — Prepared exclusively for ABC LLC. Unauthorized distribution prohibited.

Secure remote access with strong authentication and encryption

HIGH

PRIORITY-IMPACT RATING

6 (planning weight)

RECOMMENDED SERVICE

Identity & Access Improvement

BUSINESS IMPACT

Exposed or weakly protected remote access is a frequent entry point for ransomware and unauthorized data access. For distributed or hybrid teams, insecure remote paths can interrupt operations and create significant recovery costs.

CATEGORY

Identity & Access

Medium Priority (10)

Standardize how business documents are organized

MEDIUM

PRIORITY-IMPACT RATING

6 (planning weight)

RECOMMENDED SERVICE

Productivity & Collaboration Improvement

BUSINESS IMPACT

Ad hoc folder sprawl and inconsistent naming waste time and cause version errors. Standardization reduces search friction and makes onboarding and audits far simpler.

CATEGORY

Productivity & Collaboration

Plan hardware lifecycle and refresh

MEDIUM

PRIORITY-IMPACT RATING

6 (planning weight)

RECOMMENDED SERVICE

Technology Strategy Improvement

BUSINESS IMPACT

Unplanned hardware aging increases failure risk, performance complaints, and emergency replacement cost. Warranty cliffs and unsupported devices also complicate security and support.

CATEGORY

Technology Strategy

Confidential — Prepared exclusively for ABC LLC. Unauthorized distribution prohibited.

Make the environment supportable by another IT professional

MEDIUM

PRIORITY-IMPACT RATING

6 (planning weight)

RECOMMENDED SERVICE

Documentation & Knowledge Improvement

BUSINESS IMPACT

When only one person can support the environment, illness, turnover, or provider change creates outsized operational risk. Knowledge concentration slows incident response and raises transition cost.

CATEGORY

Documentation & Knowledge

Keep technology documentation current after changes

MEDIUM

PRIORITY-IMPACT RATING

6 (planning weight)

RECOMMENDED SERVICE

Documentation & Knowledge Improvement

BUSINESS IMPACT

Outdated documentation creates false confidence—teams follow wrong diagrams or miss new systems during incidents. Stale records waste time and can extend outages.

CATEGORY

Documentation & Knowledge

Conduct executive technology reviews on a defined schedule

MEDIUM

PRIORITY-IMPACT RATING

6 (planning weight)

RECOMMENDED SERVICE

Technology Strategy Improvement

BUSINESS IMPACT

When executives do not review technology health, priorities, and risks, decisions default to the loudest incident. Strategic work loses sponsorship and funding clarity.

CATEGORY

Technology Strategy

Confidential — Prepared exclusively for ABC LLC. Unauthorized distribution prohibited.

Review business applications on a defined cadence

MEDIUM

PRIORITY-IMPACT RATING

6 (planning weight)

RECOMMENDED SERVICE

Technology Strategy Improvement

BUSINESS IMPACT

Unreviewed applications accumulate unused licenses, overlapping tools, and outdated platforms that increase cost and support burden. Security and vendor risk can linger unnoticed.

CATEGORY

Technology Strategy

Maintain a current technology asset inventory

MEDIUM

PRIORITY-IMPACT RATING

6 (planning weight)

RECOMMENDED SERVICE

Documentation & Knowledge Improvement

BUSINESS IMPACT

Without a current inventory of devices, servers, and major software, leaders cannot plan refresh cycles, license needs, or security coverage confidently. Missing assets are easier to overlook in patching, backup, and retirement decisions.

CATEGORY

Documentation & Knowledge

Support secure mobile and on-the-go work

MEDIUM

PRIORITY-IMPACT RATING

6 (planning weight)

RECOMMENDED SERVICE

Productivity & Collaboration Improvement

BUSINESS IMPACT

Mobile work without a supported pattern pushes staff toward personal email, unsecured apps, and local copies of business data. A clear secure-mobile approach protects productivity for field and traveling roles.

CATEGORY

Productivity & Collaboration

Confidential — Prepared exclusively for ABC LLC. Unauthorized distribution prohibited.

Document and run a device lifecycle process

MEDIUM

PRIORITY-IMPACT RATING

6 (planning weight)

RECOMMENDED SERVICE

Endpoint Management Improvement

BUSINESS IMPACT

Without a clear device lifecycle, organizations overpay for aging hardware, rush emergency replacements, and leave retired devices with residual data or accounts. Lifecycle gaps also make warranty, imaging, and redeployment inconsistent.

CATEGORY

Endpoint Management

Establish an internet resilience strategy for business continuity

MEDIUM

PRIORITY-IMPACT RATING

6 (planning weight)

RECOMMENDED SERVICE

Network & Connectivity Improvement

BUSINESS IMPACT

Single-circuit internet failure stops cloud apps, payments, VoIP, and remote work for many SMBs. Without a resilience plan, outages become all-or-nothing events with no agreed temporary path.

CATEGORY

Network & Connectivity

Low Priority (14)

Maintain licensing and warranty records

LOW

PRIORITY-IMPACT RATING

4 (planning weight)

RECOMMENDED SERVICE

Documentation & Knowledge Improvement

BUSINESS IMPACT

Missing license and warranty records lead to surprise renewals, compliance uncertainty, and hardware left unprotected after coverage expires. Budget planning becomes reactive rather than scheduled.

CATEGORY

Documentation & Knowledge

Confidential — Prepared exclusively for ABC LLC. Unauthorized distribution prohibited.

Define a clear technology vision for the organization

LOW

PRIORITY-IMPACT RATING

4 (planning weight)

RECOMMENDED SERVICE

Technology Strategy Improvement

BUSINESS IMPACT

Without a shared technology vision, teams make local tool choices that conflict, and multi-year investments lack a north star. Vendors and staff receive mixed signals about what “good” looks like.

CATEGORY

Technology Strategy

Review user permissions on a recurring schedule

LOW

PRIORITY-IMPACT RATING

4 (planning weight)

RECOMMENDED SERVICE

Identity & Access Improvement

BUSINESS IMPACT

Permissions accumulate over time as people change roles. Without periodic review, dormant access increases unauthorized-use risk and makes investigations slower when something goes wrong.

CATEGORY

Identity & Access

Document critical vendors and support contacts

LOW

PRIORITY-IMPACT RATING

4 (planning weight)

RECOMMENDED SERVICE

Documentation & Knowledge Improvement

BUSINESS IMPACT

When vendor contacts, contract terms, and escalation paths are unknown, outages and renewals create avoidable delay. Leadership loses negotiating leverage and support teams waste time finding who can help.

CATEGORY

Documentation & Knowledge

Confidential — Prepared exclusively for ABC LLC. Unauthorized distribution prohibited.

Document data retention requirements

LOW

PRIORITY-IMPACT RATING

4 (planning weight)

RECOMMENDED SERVICE

Data Protection & Recovery Improvement

BUSINESS IMPACT

Undocumented retention leads to keeping everything forever—or deleting too soon. Either outcome creates legal, operational, or storage risk and complicates restore and e-discovery expectations.

CATEGORY

Data Protection & Recovery

Monitor endpoint hardware health

LOW

PRIORITY-IMPACT RATING

4 (planning weight)

RECOMMENDED SERVICE

Endpoint Management Improvement

BUSINESS IMPACT

Undetected disk, battery, or hardware faults lead to surprise downtime and data-loss risk when devices fail mid-work. Light health monitoring shifts replacements from emergency to planned work.

CATEGORY

Endpoint Management

Keep network documentation current after changes

LOW

PRIORITY-IMPACT RATING

4 (planning weight)

RECOMMENDED SERVICE

Network & Connectivity Improvement

BUSINESS IMPACT

Stale network diagrams and inventories slow incident response and make vendor handoffs unreliable. Documentation that exists but is never updated after changes recreates tribal-knowledge risk.

CATEGORY

Network & Connectivity

Confidential — Prepared exclusively for ABC LLC. Unauthorized distribution prohibited.

Continuously improve security practices based on incidents and reviews

LOW

PRIORITY-IMPACT RATING

4 (planning weight)

RECOMMENDED SERVICE

Security Operations Improvement

BUSINESS IMPACT

Static security practices drift as tools, staff, and threats change. Without continuous improvement, the organization repeats the same failures and spends money on controls that no longer match how the business operates.

CATEGORY

Security Operations

Ensure employees have the technology needed to succeed

LOW

PRIORITY-IMPACT RATING

4 (planning weight)

RECOMMENDED SERVICE

Productivity & Collaboration Improvement

BUSINESS IMPACT

Underpowered devices, missing peripherals, or lack of required software create quiet productivity losses and workarounds. Equipping roles appropriately is foundational to every other productivity investment.

CATEGORY

Productivity & Collaboration

Assign ownership for endpoint management

LOW

PRIORITY-IMPACT RATING

3 (planning weight)

RECOMMENDED SERVICE

Endpoint Management Improvement

BUSINESS IMPACT

Without a named owner, inventory, patching, encryption, and lifecycle work stall between IT providers and business leaders. Ambiguous ownership is a common reason endpoint gaps recur after one-time cleanup projects.

CATEGORY

Endpoint Management

Confidential — Prepared exclusively for ABC LLC. Unauthorized distribution prohibited.

Assign ownership for technology documentation

LOW

PRIORITY-IMPACT RATING

3 (planning weight)

RECOMMENDED SERVICE

Documentation & Knowledge Improvement

BUSINESS IMPACT

Without a named owner, documentation tasks fall through the cracks between internal staff and providers. Accountability gaps are a common reason inventories and diagrams decay.

CATEGORY

Documentation & Knowledge

Assign ownership for productivity and collaboration improvements

LOW

PRIORITY-IMPACT RATING

3 (planning weight)

RECOMMENDED SERVICE

Productivity & Collaboration Improvement

BUSINESS IMPACT

Without a named owner, platform sprawl, license waste, and workflow friction recur after one-time cleanups. Durable ownership keeps productivity standards current as teams and tools change.

CATEGORY

Productivity & Collaboration

Assign ownership for recovery readiness

LOW

PRIORITY-IMPACT RATING

3 (planning weight)

RECOMMENDED SERVICE

Data Protection & Recovery Improvement

BUSINESS IMPACT

Backup products without a recovery owner still fail in practice—failed jobs, stale plans, and untested restores go unaddressed. Clear ownership keeps recovery readiness current between assessments.

CATEGORY

Data Protection & Recovery

Confidential — Prepared exclusively for ABC LLC. Unauthorized distribution prohibited.

Assign clear technology leadership ownership

LOW

PRIORITY-IMPACT RATING

3 (planning weight)

RECOMMENDED SERVICE

Technology Strategy Improvement

BUSINESS IMPACT

Ambiguous technology leadership slows decisions, blurs accountability with providers, and leaves risk ownership unclear. Improvements stall when nobody is empowered to prioritize.

CATEGORY

Technology Strategy

Confidential — Prepared exclusively for ABC LLC. Unauthorized distribution prohibited.
