Technology Maturity Roadmap

Phased StackScore improvement path for executive planning

This roadmap shows how your StackScore can improve as recommendations are addressed in priority order. Use it to sequence remediation, allocate budget, and align technology projects with business risk reduction.

Current StackScore	68
After Critical Recommendations	76
After Critical + High Recommendations	76
After All Recommendations	86
Target Score	80+

HOW TO USE THIS ROADMAP

- Address Critical items first to reduce immediate business and security risk.
- High-priority items deliver the next wave of meaningful score improvement.
- Medium and Low items complete the path toward the 80+ maturity target.
